Impaired Driving Implications for Service Members

April 10 - 11, 2025
San Antonio, TX

Tuition: $0 Conf. fee: $0

Operation Safe Arrival: Impaired Driving Implications for Service Members brings together the military and state and county judges who may preside over impaired driving cases involving service members.

When an active duty member of the military appears in a civilian court as a defendant in an impaired driving case, there are unique circumstances the judge needs to understand to ensure the effective and efficient administration of justice.

Presenters include former military judges, a U.S. magistrate judge, a state court judge and ABA National Judicial Fellow. Rich discussion with the course faculty, as well as with fellow students, will give participants the opportunity to learn the different ways these cases are handled and the unique issues inherent to military defendants.

This course was expanded to two days based on the recommendation of prior attendees.

Who should attend?

Judges who frequently have members of the military appear in their courts.

What is included in the fees?

This is a grant-supported course. The tuition of $899 is covered by the grant. Attendees are responsible for travel, lodging and meals.

Objectives

- Describe the unique vocabulary, acronyms, and cultural considerations of military service.
- Identify the jurisdictional issues between state, federal, and military entities regarding impaired driving with discussion of exclusive and concurrent jurisdictional arrangements.
- Explain the different legal processes and penalties in state, federal, and military courts for impaired driving offenses.
- Recognize the administrative consequences to service members related to deployment, separation, reenlistment, driver license suspension, probation, and referral to treatment programs.

Established in 1963, the NJC is a nonprofit organization and the only educational institution in the U.S. that teaches judges of all types from across the 50 states, Indian Country and abroad.
